Phone:	+234-707-554-3599

SECTION 1: PROFESSIONAL PROFILE

Role: Automation Engineer & Software Developer

Founder, Hebzibar Innovative Solutions

Designs small intelligent systems that automate manual workflows. Builds data pipelines, system interfaces, and digital tools for SMEs.

Research-driven developer with strong background in Computer Science (*B.Sc. – awaiting final exam & certification, Esep Le Berger University, Benin Republic – expected Jan 2026*).

SECTION 2: PROJECT / SERVICE HIGHLIGHTS

A. Micro-Automation Gigs

Python data automation, Google-Form-to-Sheet integrations, report scripts. Zapier-style workflows for small business digitization.

Pricing: ■40,000 – ■80,000 per task (2–5 days delivery).

B. Local Tech Collaborations

Automation consultancy for offices (Interswitch, IBEDC, Oyo ICT Board).

Focus: internal task optimization, data processing, file-flow automation.

C. Hebzibar Vision

Building a network of creative systems that make organizations run like living organisms — intelligent, self-aware, and efficient.
